

# CROSSBEAM EXCHANGE PROGRAM

## BENEFITS:

- Trade up to more processing power
- Improve your network's performance
- Keep pace with the speed of technology
- Increase your networks adaptability

Crossbeam's X-Series architecture has always made it easy to keep pace with the ever-increasing speed of technology. With the Crossbeam eXchange program, it just got a little easier. Increase your processing power by trading in older application processor modules (APMs), control processor modules (CPMs), and network processor modules (NPMs) for rebates on the purchase of latest generation xPM-8600/8650 and NPM 8620 modules.

### WHAT IS THE PROGRAM?

The Crossbeam eXchange program is a simple way to significantly improve the performance and the resilience of your security network. Upgrading to the new xPM-8600/8650 and NPM 8620 and 8650 modules can improve your capacity up to 100%.

The APM 8600 and APM 8650 modules include a number of features that improve your network's ability to adapt to whatever performance demands and compliance requirements come your way. Up to eight core CPUs ensure that your security applications will never be under-powered.

The NPM 8620 module adds 5 Gbps of throughput; ideal for adding multiple network security applications to the network perimeter. The NPM 8650 module continues to deliver 10 Gbps throughput while increasing chassis performance up to 40 Gbps connectivity.

The CPM 8600 comes standard with 1 -120 GB SATA drive, with a second optional, and 1 Gbps switch fabric connection, vastly improving application boot times and system latency.

To take advantage of this rebate, simply replace any number of NPM 8200/8400, CPM-8100/8400 or APM-8200/8400 with the same quantity of newer modules. Note the serial number of the modules that you are replacing and include them on the order for the new xPM-8600/8620/8650 and the appropriate rebate will be applied to your order. Make sure to include the promotional code with the order for the new modules.

### CONDITIONS

All customers with X-Series "AC-2" chassis or above are eligible for the rebate. Service contracts must be updated with the new serial numbers. This program expires March 31, 2010.

### ELIGIBLE PRODUCT AND TERMS

Crossbeam Product	Upgrade to	End User Rebate (USD)	Rebate Code
APM-8200/8400	APM 8600 or APM 8650	\$850	CB-AP/CP CXP-09
CPM-8100/8400	CPM 8600	\$850	CB-AP/CP CXP-09
NPM 8200/8400	NPM 8620	\$3,000	CB-NPM2 CXP 09
NPM 8200/8400	NPM 8650	\$5,000	CB-NPM2 CXP 09

## ABOUT CROSSBEAM

We improve the sophisticated networks of enterprises, government agencies, and service providers by architecting platforms that are more adaptable, high-performing, reliable, and secure.
