

BENEFITS:

- Convenient - Accessible anytime, anywhere, 24hrs a day
- Engaging - Remote "hands-on" experience
- Cost effective - Eliminate travel time and expenses
- Interactive - Access to expert Crossbeam instructors

One thing that remains the same across industries and in any organization is that companies everywhere continuously search their business practices for opportunities to increase efficiency and cut costs. For many, that puts a strain on IT departments; including training. As a result, Crossbeam developed our new Remote Training program to help our customers cost-effectively realize the long-term benefits of education and knowledge transfer.

CROSSBEAM REMOTE TRAINING

Crossbeam Remote Training is designed to support your learning initiatives by focusing on both interactivity and expert instruction. This delivery method leverages the knowledge of our subject matter experts with sophisticated, interactive self-paced content offering flexibility to your training budget. Our Remote Training effectively incorporates the latest instructional design methodologies.

Crossbeam Remote Training is the perfect training solution for companies of all sizes, as well as individuals.

Crossbeam Remote Training Lab - Providing remote remote "hands-on" experience from anywhere in the world

Crossbeam's Remote Training Courses Provide:

- Direct connectivity to the latest live remote X-Series equipment and security applications
- Customizable learning experience with Crossbeam's Learning Management System
- Interactive multimedia education with online access to expert Crossbeam instructors

Benefits of Remote Training:

1. Avoid travel costs - Studies show that as much as 40 cents of every dollar spent on in-person training goes to travel and lodging costs. Those and other fixed expenses are avoided entirely when Web-based training replaces classroom instruction.
2. Convenience - Busy employees can participate in training on their laptops at locations and times convenient to them.
3. Increase retention and productivity - Interactive learning using Crossbeam's Remote Training Labs increases participant retention and satisfaction, resulting in higher productivity.
4. Flexibility - Whether an employee prefers to learn at night or in the morning, the employee can take the training at anytime during the period in which they are enrolled.
5. Informal learning - As technology becomes more and more prevalent in our society, we can take advantage of this and receive even the most important training from anywhere.
6. Global impact - Even the smallest organizations can have global training needs. With Crossbeam's Remote Training, companies can make training available to all their employees, wherever they reside.
7. Easy and Efficient - Sitting at a laptop with access to the most relevant and up-to date information while having direct access to live remote training labs with "real-world" security applications.

WHAT YOU CAN DO WITH REMOTE TRAINING:

Quickly train new employees

You can quickly train new employees on critical competencies providing them the information they need to hit the ground running. They can train anytime they need and in a shorter amount of time on only the aspects they need to do their job.

Stay Updated

When you plan to upgrade to the latest XOS platform, Crossbeam's Remote Training provides an easy way for you to understand and prepare for feature changes and additions.

Become Certified

- Obtain a new Crossbeam Certification
- Renew your existing Crossbeam Certified Specialist and Crossbeam Certified Expert
- Increase from Crossbeam Certified Specialist to Crossbeam Certified Expert

Implement ISV Partner Applications

After taking XOS Essentials students have the option of taking application-specific workshops that focus directly on implementing a partner solution on the Crossbeam platform.
