

# Crossbeam Systems, Inc.'s Product Environmental Policy Statement

Crossbeam's Corporate Product Environmental Compliance Policy is to design, produce, deliver and support products and services that are environmentally responsible throughout all phases of their life cycle. Our commitment involves closely monitoring our compliance with local, regional and international laws in all of our locations around the world. We work actively with governments, industry partners, consortia, and others as we strive to harmonize various product design regulations with technological innovation.

We are committed to reduce fossil fuel usage through development of energy-efficient designs that reduce power consumption and cooling requirements while delivering improved product performance for our customers globally.

The priorities of the Crossbeam design and Operations teams are:

- Promoting Product Energy Efficiency
- Increasing and utilizing Materials Innovation
- Reducing/removing hazardous substances from products
- Using Recyclable Materials

Crossbeam objectives for product design and manufacture include:

- Reducing CO2 product footprint
- Reducing ozone-depleting materials and/or substances
- Meeting global hazardous substance legislation requirements.

## ABOUT CROSSBEAM

We improve the sophisticated networks of enterprises, government agencies, and service providers by architecting platforms that are more adaptable, high-performing, reliable, and secure.
