

# CROSSBEAM TRAINING COURSE DESCRIPTIONS: CROSSBEAM IPS SOLUTION WITH SOURCEFIRE ON-LINE TRAINING (CBS-WEB-TRNG-SF-IPS)

This Web base training includes a pre-recorded presentation with details of using the combined power of the Crossbeam X-series chassis high performance, reliability and redundancy with the IPS advantage of Sourcefire 3D System technology. Once registered for this course you will have immediate access to the presentation for up to 30 days to review at your convenience. You will also have remote access to perform lab activity on the actual Crossbeam chassis in combination with the Sourcefire 3D System IPS and RNA application. Participants will have scheduled dedicated time to complete the lab activity, which include installation and configuration of both Sourcefire and Crossbeam software. You will have access to an instructor during a Q&A session and will participate in an assessment certification test.

#### **COURSE LENGTH:**

6 hours course duration with 30 days to access the presentation.

#### **AFTER COMPLETION OF THIS COURSE, YOU SHOULD BE ABLE TO:**

- Install Sourcefire 3D System application on the Crossbeam chassis.
- Describe and configure a passive Sourcefire installation on the X-series chassis.
- Describe and configure an active (in-line) Sourcefire installation on the X-series chassis.
- Implement either IPS sensors or RNA on a Crossbeam X-series VAP group.
- Monitor and troubleshoot the Crossbeam - Sourcefire implementation.
