

CROSSBEAM X45 BUNDLES

BENEFITS:

- Utilize best-in-class applications to fit your business and maximize security
- Take advantage of dramatic network consolidation at a lower cost of entry
- Extend hardware depreciation cycles to 5+ years
- Decrease downtime with a self-healing platform

We believe our proven approach to network consolidation should be open to all businesses, no matter the size of their budget. That's why we created the X45 Bundles - a unique way to get started with Crossbeam, and take advantage of the X-Series platform. Choose from two bundles. The 8-Core Bundle is perfect for consolidating one security service such as Firewall or IPS. The 16-Core Bundle adds additional application performance, allowing multiple security services to be consolidated together.

A LOOK INSIDE THE BUNDLES

Our X45 Bundles use a combination of Network Processor Modules (NPM), Application Processor Modules (APM) and Control Processor Modules (CPM) pre-configured to run any certified security application from our best-in-class technology partners.

The NPM-8620, which is included with every Bundle, provides 5 Gbps of network processing capacity and 10x1GbE SFP interfaces giving you plenty of connectivity. Each kit can be expanded to 20Gbps of network processing capacity.

Application processing comes from the powerful and latest generation APM 8650 modules. The 8-Core Bundle that utilizes one APM 8650 blade provides an impressive 3Gbps of Firewall performance under real-world traffic loads. The 16-Core Bundle that has two APM 8650 blades is capable of processing up to 5Gbps.

Both Bundles use the latest generation CPM 8600 that comes pre-configured with RAID 1 and two HDD. To add additional resilience, the Bundles come pre-populated with two 1200W power supplies.

Premium support, which includes 24x7 telephone, email and web, next day, advanced hardware replacement and access to the Crossbeam knowledgebase as well as XOS updates, is available at a special packaged price, exclusively for the Bundles.

CONDITIONS

Bundles are compatible with XOS v8.5.4 or later. Available to ship from May 2010. Additional NPM, APM and CPM modules may be added to the Bundles. Modules that ship with the Bundles are restricted and will only work within the X45 chassis. There is no limit on number of Bundles purchased but they cannot be combined with any other promotional programs. Support must be purchased with the Bundles.

ELIGIBLE PRODUCT AND TERMS

Crossbeam Product Code	Description
X45-KIT-R-8-CORE	X45 chassis, 1 NPM-8620, 1 8CORE APM-8650, 1 CPM-8600, 2 1200W PSUs
X45-KIT-R-16-CORE	X45 chassis, 1 NPM-8620, 2 8CORE APM-8650, 1 CPM-8600 2 1200W PSUs
CBS-CT-X45-KIT-8CORE	Premium Direct Support via Crossbeam for 8CORE BUNDLE
CBS-CT-X45-KIT-16CORE	Premium Direct Support via Crossbeam for 16CORE BUNDLE
