

CROSSBEAM TRAINING COURSE DESCRIPTIONS: XOS EXPERT CERTIFICATION (CBS-TRNG-EXP-CERT)

Crossbeam Systems Expert certification indicates expert level knowledge of Crossbeam Systems Security Switches across XOS and Independent Software Vendors software solutions.

COURSE LENGTH:

1 day.

The Crossbeam Systems Certified Expert (CSCE) is a high level certification and a requirement for all Crossbeam Systems Partners Engineers. Candidates who achieve this certification have mastered complex configuration, troubleshooting, and operation of the XOS platform. Prerequisites for obtaining the CSCE are as follows:

1. At least 3 years professional experience in security and networking technologies.
2. At least 6 months field experience with X-Series platforms.
3. Crossbeam Systems XOS Specialist Certification (CSCS).

The Crossbeam Expert course is designed to prepare qualified candidates for the CSCE. The CSCE exam is administered as a 2 and 1/2 hour multiple choice test, and a 2 and 1/2 hour lab practical.

For the lab practical, candidates will be presented with documented, complex configuration scenarios. The candidate must successfully demonstrate configuration, diagnose and remedy in the time allotted.

The multiple choice test includes questions on the XOS/NMS configuration, troubleshooting, and operation as well as more general questions intended to validate the candidates overall knowledge of Linux system administration, Networking, and Information Security. The complex lab scenarios necessarily include the installation, configuration, and troubleshooting of applications, in particular Check Point VPN-1.
